PAGES 1 ENCLOSURES (NO. &amp; TYPE) 25X1A

REMARKS [REDACTED]

25X1X

1. On 11 May 1951, concreting of the runway at Werneuchen airfield was started at its western end. According to orders given by the construction office at the field, materials used for one cubic meter of concrete included 300 kg of cement, 87 liters of water, 1,239 kg of gravel, 504 kg of broken stones of 3 to 12 mm grade, and 300 kg of broken stones of 10 to 20 mm grade. One cubic meter of concrete is adequate for an area of five square meters. Three concrete mixers were being used. According to Soviet blueprints, a total of 5,152 meters of drainage pipes were to be laid. The pipes were about 40 to 80 cm in diameter. \*
2. On 12 May, 1,250 German laborers were employed at the field. It was rumored among employees of the German construction office that 1,000 additional workers from Saxony were to be hired and that the target date for the completion of the work had been advanced to 1 August 1951. \*\* A board fence was being erected around the quarters for laborers. The entrance to these quarters has been recently guarded by members of the VVN (Victims of Nazi Persecution) and the SED.
3. On 13 May, a detail of 50 men were cleaning nine twin-engine aircraft with three-bladed propellers which were parked in front of the hangars. \*\*\* Truck [REDACTED] was seen at the field. Bus [REDACTED] occupied by six officers came from Werder.

25X1B

25X1B

\* [REDACTED] The information on the concrete indicates that the ratio of the concrete mixture is 1:7 and that the concrete cover will be about 20 cm thick.

25X1A

\*\* [REDACTED] Comment. It was previously reported that the target date for completion of the work was set for 1 September 1951. [REDACTED]

25X1A

\*\*\* [REDACTED] Comment. [REDACTED] reported that 32 twin-engine planes were parked in the hangars. [REDACTED] The planes were not seen flying.
